The fund's total assets will be invested in accordance with the ESG Policy, as outlined below and further described in the Singapore Prospectus: Companies are evaluated by the Investment Adviser ("IA") based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance. The IA conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the IA may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the IA uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.	Refer to "Investment Objective, Policy and Strategy" and "Use of Derivatives and Securities Lending" of the Singapore Prospectus for further information on investment strategy.

KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The price of Shares of the ILP sub-fund and any income from them may fall as well as rise. **These risk factors may cause you to lose some or all of your investment.**	Refer to "Risk Factors" of the Singapore Prospectus for further information on risks of the product.
Market and Credit Risks	

• **The ILP sub-fund may be subject to Currency Risks**
  ○ Foreign currency exchange rate movements are likely to influence the returns to investors in Singapore, hence investors may be exposed to exchange rate risks.
  ○ For Hedged Share Classes, while the ILP sub-fund attempts to hedge currency risks, there can be no guarantee that it will be successful in doing so.
• **The ILP sub-fund may be subject to Emerging and Frontier Market Risks**
  ○ The ILP sub-fund may invest in one or more emerging markets and frontier markets and may be subject to a higher than average volatility than investing in more developed markets due to greater political, tax, economic, social, foreign exchange, custodial, liquidity, regulatory or other risks.
• **The ILP sub-fund may be subject to Foreign Investment Restrictions Risks**
  ○ Some countries prohibit or restrict investment, or the repatriation of income, capital or the proceeds from sale of securities. The ILP sub-fund may incur higher costs investing in these countries. Such restrictions may delay the investment or repatriation of capital of the ILP sub-fund.
• **The ILP sub-fund may be subject to Limited Market Sectors Risks**
  ○ The ILP sub-fund's investments are concentrated in the technology sector. This may subject the ILP sub-fund to greater volatility and more rapid cyclical changes than more broad-based investments.
• **The ILP sub-fund may be subject to Equity Risks**
  ○ The values of equities fluctuate daily and can be influenced by many factors including issuer-specific factors and broader economic and political developments.	

Liquidity Risks	
• **Redemptions may be suspended in certain circumstances detailed in the Prospectus.**	
Product-Specific Risks	
• **The ILP sub-fund may be subject to Derivatives Risks** ○ The use of derivatives may expose the ILP sub-fund to a higher degree of risk. Derivative contracts can be highly volatile and a relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can hence increase the Fund's volatility. The ILP sub-fund may sustain loss as a result of the failure of a derivatives counterparty to comply with the terms of the derivatives contract.	

• **The ILP sub-fund may be subject to ESG Investment Policy Risk** ○ The use of ESG criteria may affect the ILP sub-fund's investment performance and, as such, the fund may perform differently compared to similar funds that do not use such criteria. • **The ILP sub-fund may be subject to the risks of Securities Lending** ○ The ILP sub-fund may engage in securities lending. As such, the ILP sub-fund will have a credit risk exposure to the counterparties to any securities lending contract. The ILP sub-fund's investments can be lent to counterparties over a period of time. A default by the counterparty combined with a fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of the ILP sub-fund. • **The ILP sub-fund may be subject to Smaller Capitalisation Companies Risk** ○ The ILP sub-fund may invest in small cap companies. Such investments may have higher than average volatility and liquidity risks.
