19 August 2025

Dear AIA Policy Owner,

We are pleased to update you on the performance of AIA Investment-Linked Policy (ILP) Funds for the first half of 2025.

The global economy demonstrated resilience in the first half of 2025, despite trade tensions brought about by Trump's Liberation Day. In the US, a robust economy and strong labour market, coupled with lower-than-expected inflation, supported the Federal Reserve's decision to resume its rate cut cycle. Across the Atlantic, economic growth is expected to remain modest for the Eurozone in 2025, with trade tension expected to fuel greater uncertainty. Nevertheless, planned increases in defence and infrastructure expenditures are projected to provide support for European industries over the coming decades. In Asia, Chinese consumer confidence remained weak as efforts to boost consumptions through the national trade-in scheme for home appliances appeared to only provide a temporary support to the economy.

During the first six months of 2025, investors reallocated assets away from US assets. This shift, alongside rising EU and Japanese government bonds yields, led to a significant weakening of the US dollar, which depreciated by 6.9% against the Singapore dollar. Yields on Singapore Government Securities ("SGS") generally declined across maturities due to limited supply, with the 10-year SGS yields ending lower at 2.2% compared to 2.8% at the end of 2024. The equity markets also experienced notable volatility, driven by the sharp sell-off post-Liberation Day. Following this, the Straits Times Index recorded its largest single day decline of 7.5% since the 2008 Global Financial Crisis. Major equity indices including the S&P 500 and Hang Seng Index, also suffered double-digit declines. Nevertheless, equity markets rebounded swiftly, returning to near-record highs in local currency terms. European equities led this remarkable recovery, rising by 17.5% in SGD terms represented by Euro Stoxx 50 Index, bolstered by government announcements of trillions in additional defence and infrastructure spendings over the next decade. Meanwhile, the technological landscape saw a shift as market participants driven by the efficiency of DeepSeek, rotated out of US Technology giants into Chinese offshore equities, reevaluating the technological prowess of the US against its Chinese counterparts. Despite the initial sharp drawdown, Singapore equities displayed impressive resilience, posting returns of +7.3% for the first half of 2025.

Though markets have demonstrated remarkable resilience, the lingering policy uncertainty under President Trump remains a key concern, potentially triggering volatility as market participants respond to policy measures. Looking ahead to the second half of 2025, factors such as renewed tariff threats, ballooning US deficit, escalation in geopolitical tension, and independence of the Federal Reserve present

notable risks. At AIA, we pride ourselves on our unwavering commitment to professional stewardship through active management and oversight. This disciplined approach, we believe not only effectively navigates our portfolios through global uncertainties but also ensures sustainable long-term investment outcomes for our policy owners.

ILP Performance

Notwithstanding a turbulent start to 2025, we are pleased to share that AIA Elite Adventurous Fund SGD (the largest portfolio under our flagship AIA Elite Funds) has achieved top quartile ranking among its peers and generated positive absolute returns since inception. This respectable performance amid the volatile macroeconomic backdrop is a testament to AIA's prudent investment stewardship.

We are also delighted to share that both our AIA Global Dynamic Income Fund and the AIA Global Adventurous Income Fund have continued to meet their dividend targets, delivering strong returns to our investors. This underscores AIA's commitment to delivering reliable and effective investment solutions for our policy owners. Furthermore, the AIA Global Adventurous Income Fund saw significant net inflows throughout the year, growing to S\$1.1 billion assets under management, demonstrating the enduring confidence our policy owners have in us.

AIA is a key life insurer managing one of Singapore's largest investment-linked insurance funds with over S\$14.1 billion assets under management as of 30 June 2025. Our commitment to delivering long-term value for our policy owners remains steadfast, and we strive to provide clear and relevant information to help you make well-informed investment decisions.

Thank you for your continued trust and support.

Yours sincerely,

Wong Sze Keed

Chief Executive Officer

INTRODUCTION

Welcome to the AIA Semi-Annual Funds Report 2025

The following pages offer a review of AIA Funds for January to June 2025. For each fund, you will find useful information including:

The trades executed by Capital is on a best execution basis and there is no churning of trade for Capital Group European Growth and Income Fund. Based on our bottom-up investment process, portfolio turnover is the result of changes in security selection. Our turnover is the result of normal relative value changes in the portfolio, generally resulting from a long-term price or return target being met and our selling of the position and investing into a new or higher conviction investment. Due to our long-term approach, we build positions over time and rarely move in and out of large positions quickly resulting in a relatively low turnover.

Soft Dollar Commissions

For the period ended 30 June 2025, the Investment Manager and any Affiliated Sub-Investment Manager, if applicable, does receive and has entered into soft-dollar commissions/arrangements with brokers relating to portfolios of the Underlying Fund that invest in equity securities, in respect of which certain goods and services used to support the investment decision making process were received. The soft commission arrangements were entered into on the basis that the execution of transactions on behalf of the Underlying Fund will be consistent with best execution standards and brokerage rates will not be in excess of customary institutional full-service brokerage rates.

Additionally, due to the nature of the investment strategy of certain Portfolios, including where the Investment Manager delegates investment management services to AllianceBernstein Limited, AllianceBernstein (Europe) Limited and CPH Capital Fondsmæglerselskab A/S, all costs associated with soft commission arrangements may be “unbundled,” if required by applicable law, and borne by the Investment Manager or its Affiliated Sub-Investment Manager. The goods and services received include specialist industry, company and consumer research, portfolio and market analysis and computer software used for the delivery of such services. The nature of the goods and services received is such that the benefits provided under the arrangement must be those which assist in the provision of investment services to the Underlying Fund and may contribute to an improvement in the Underlying Fund’s performance.

For the avoidance of doubt, such goods and services do not include travel, accommodations, entertainment, general administrative goods or services, general office equipment or premises, membership fees, employees’ salaries or direct money payments. Disclosure of soft commission arrangements will be made in the Financial Reports of the Underlying Fund.

1. SIGNIFICANT ACCOUNTING POLICIES

The Statements, expressed in Singapore dollars and United States dollars, are prepared in accordance with the historical cost convention, modified by the revaluation of investments at market prices.

The Funds' policyholders are mainly from Singapore with the subscriptions and redemptions of the units denominated in Singapore dollars and United States dollars.

Income and Expenditure Recognition

Dividends are recognised when the right to receive payment is established. Interest income is recognised on a time-proportionate basis using the effective interest method. Fund expense subsidies are recognised under net management fees account. Other income and expenses are recognised on an accruals basis.

Investments at Fair Value

Purchases of investments are recognised on the trade date. Equity securities are valued at the market closing price prevailing at the balance sheet date. Debt securities are valued at the bid price prevailing at the balance sheet date. Investments in Funds are valued at quoted market prices. Changes in fair value of investments are recognised in the Capital and Income Account.

Disposal of Investments

Sales of investments are recognised on the trade date. For the purpose of determining net realised gains or losses on sale of investment, the cost of disposal of investment is determined on the weighted average cost basis. All gains and losses are taken up in the Capital and Income Account.

Financial derivatives are financial instruments which include forward contracts. Financial derivatives outstanding at the balance sheet date are measured at their respective fair values provided by a financial service provider. The resulting unrealised gains or losses are taken to the Capital and Income Account.

Foreign Currencies

Foreign currency monetary assets and liabilities are translated at exchange rates prevailing at the balance sheet date. Foreign currency transactions are translated at exchange rates on transaction dates. Differences in exchange are included in the Capital and Income Account.

Dividend Distribution

Dividend distribution is recorded on the date when the declaration is made by Fund.
